SUMMARY

I am a full-stack web developer. I am passionate about full-stack web development and use technologies of web development such as (HTML, CSS, Bootstrap, TailwindCSS, JavaScript, React, Express JS, Node JS, Firebase, MongoDB, Stripe, and SSLCommerz). Recently my team and I made FITLESSIAN where I was the **team leader** and my team took the top place. And I also maintained a scrum as a **scrum leader**.

PROJECTS:

Fitlessian (Team-Project: Fitness Tracker Website)

[Live Site](#) | [Client Repo](#) | [Server Repo](#)

- Users can set activities on basis of weight goals and see their activities on a chart according to daily, weekly, monthly, and yearly basis. They can also set their food and water limits.
- Users can connect by sending requests and communicating with each other via a message system and also communicate with instructors via video call.
- I implemented send request system, an authentication system by email and google, create an admin panel, create a custom hook for the title change, and designed a logo.
- I maintained GitHub and solved lots of merge problems. And also maintained the team as a team lead.

Technologies: React js, Node js, Express js, MongoDB, Firebase, web-vitals, Redux, Axios, React-query, React-router-dom, Tailwind CSS, Daisy UI, Kitwind, Swiper.

Arona (Resale Product Website)

[Live Site](#) | [Client Repo](#) | [Server Repo](#)

- Sellers can add products to a specific category, advertise products, and also delete products.
- Buyers can buy products and report to admin if they are not satisfied.
- Admin can verify seller by giving blue tick, make admin any user and also can delete if violate rules.

Technologies: React js, Node js, Express js, MongoDB, Firebase, Axios, React-query, React-router-dom, Tailwind CSS, Daisy UI, Kitwind, JSON Web Token and Stripe.

FLY_PLANE (Service Review Website)

[Live Site](#) | [Client Repo](#) | [Server Repo](#)

- Users can see and take the services and also can add reviews.
- There is a capability for users to see specific products and the reviews left by other users on those products. If users logged in, they can easily post a new review. If they aren't logged in, they must complete the authentication process.
- They can add services and delete previous ones.

Technologies: React js, Node js, Express js, MongoDB, React-router-dom, Tailwind CSS, Daisy UI, JSON Web Token, Firebase.

PROFESSIONAL SKILLS

Expert: HTML, HTML5, CSS, CSS3, Bootstrap, TailwindCSS (DaisyUI, Flowbite, Kitwind), JavaScript, ReactJS, Figma, GitHub, Netlify, Chrome dev tool.

Comfortable: Redux, Node JS, Express JS, Firebase, MongoDB, Stripe, and SSLCommerz.

EDUCATION

BBA Marketing, University of Rajshahi, 2019 - present
